CONTINUING PROFESSIONAL DEVELOPMENT
Learning Objectives

By the end of this session attendees will be able to:

1. Demonstrate general familiarity with the epidemiology of suicide among older adults;
2. Identify psychological factors conceptually associated with suicide risk in older adults; and
3. Discuss novel findings from empirical studies investigating the impact of specific psychological risk (e.g., social hopelessness, alcohol use, and trauma history) and/or resiliency factors (e.g., self-compassion) on suicide ideation among middle-aged and older adults.
