WHO SHOULD ATTEND

Given the interdisciplinary nature of geriatric care and the feedback from the 2016 conference evaluations, topics have been selected to appeal to a wide range of care providers including physicians, nurses, therapists (OT, PT, SLP, RT), pharmacists, dietitians, psychologists, social workers, researchers, educators and discharge planners, as well as people serving primarily in administrative positions.

ABOUT THE CONFERENCE

We are proud to present and celebrate our 31st annual conference in Geriatric Medicine that provides professionals with the opportunity to broaden their knowledge base, to refine specific skills, and to meet with others who share their concern in improving quality care for the older adult. The plenary session encourages interdisciplinary discussion of a subject common to all, while concurrent sessions provide medical updates and review of best practices of topics in geriatric care. All sessions include time for questions from participants and many speakers are available for informal discussions throughout the day. We encourage you to visit our display area in the Exhibitor Hallway.
